## **DETAILED ACTION**

### ***Response to Amendment***

1. In response to communications filed on 12/26/2007, applicant amends claim 9 and adds claims 50 and 51. The following claims, claims 1-51 are presented for examination.

### ***Response to Remarks/Arguments***

2. Applicant's arguments, pages 13-21, with respect to the rejection of claims 1-51 have been fully considered but they are moot in view of the new ground(s) of rejection.

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 18-33, 42-49, and 51 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 18-33, and 51 recite a an "apparatus" and "computer system," and are thus rejected under 35 U.S.C. 101 because the claimed invention is not directed towards a relationship/interaction between claimed processes and any hardware, thus there is not statutory support for these *apparatus* and *system* claims.

Claims 42-49 recites a “computer data signal,” and are thus rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter - the claimed subject matter not being tangible. The claimed computer program does not define any structural and functional interrelationship between the computer program and other claimed element(s) of a computer, which permit the computer program’s functionality to be realized. Such descriptive material does not exhibit any functional interrelationship with the way in which computing processes are performed and is not described as being recorded onto some computer-readable medium, thus it does not constitute statutory matter.

### ***Allowable Subject Matter***

3. Claims 1-17, 34-41 and 50 are allowed.

### ***Conclusion***
